Dear Mr Stanley Boyd,

I have carefully read your report, and with you think that it agrees in all essentials with the ideas on which we conceived yesterday. I have therefore had great pleasure in signing it, and forwarding it, as you desired, to Mr Eaton.

Believe me, with kind regards,

Sincerely yours,

Felix Semon.

Stanley Boyd, Esq.,

134 Harley St., W., London,

My dear Mr. Boyd:-

I am writing a paper at present on Cervical Ribs and in connection with your very interesting case would like to ask for information on two points. In addition to recording your own case you refer to the fact that on one occasion you saw a surgeon remove what you believed was a cervical rib on account of severe brachial neuralgia. Will you kindly tell me whether this case has ever been published and if not, would you be so kind as to ask the surgeon who did it if he would send me, if possible, at once the notes of the case?

case?

I was just completing my paper and I want to tabulate  
*operation*  
all the cases that I can lay my hands on. I have at present over  
40.

You also refer to a case in which compression of the  
subclavian was made easy on account of its high position in the neck.  
This was in a case of aneurysm. I should like to know where the  
aneurysm was situated and have any other points in connection with  
it that I might be able to obtain. In order to appear in my paper  
it would be necessary for me to have the information as soon as  
possible.

Yours very truly,
